

2025 ENERGY POLICY STATEMENT

Dawn Meats Group are a leading food processor, producing fresh and frozen meat products for the UK, Europe and Global Food Markets. The Company is committed to achieving energy performance improvements as part of our overall sustainability strategy. We have implemented an energy management system which conforms to the requirements of ISO 50001.

Dawn Meats commits to:

- Satisfying applicable legal requirements and other requirements related to energy efficiency, energy use and energy consumption. This includes the requirements of interested parties relating to climate change.
- Continual improvement of energy performance and the Energy Management System (EnMS).
- Providing a framework for setting and reviewing objectives and energy targets.
- Ensuring the availability of information and necessary resources to achieve objectives and energy targets.
- Supporting the procurement of energy efficient products and services that impact energy performance.
- Supporting the design activities that consider energy performance improvement.
- Promoting energy saving awareness to all our employees.
- Minimising our carbon emissions and reducing our impact on climate change.

This policy will be communicated to all staff and contractors. It will also be available to suppliers, customers and other interested parties including the public through selected media.

Niall Browne,
Chief Executive
